

AccuFlight was established when a love for flying and photography came together by AccuFlight's President and founder David Minor. David is an FAA-licensed commercial pilot with instrument and multi-engine-ratings and over eight years experience flying many types of single and multi-engine aircraft.

Teaming with David is a staff of pilots, photographers and office professionals that together have over forty years of aviation and professional photography experience. We utilize the latest in aviation, photographic and development technologies available and pride ourselves in keeping current with new techniques, equipment and innovations. This enables us to provide the best photographic solutions to our clients.

### AccuFlight offers:

vertical and oblique aerial photography,  
low-level ground-based aerial photography,  
aerial mapping, and survey services

## ACCUFLIGHT

AERIAL IMAGES

Providing a  
**birdseye view**  
of your world,  
on time and  
on budget.

## Why aerial photography?

Aerial photography from AccuFlight provides unique perspectives on various types of properties, locations, situations, and events. We serve real estate firms, attorneys, engineers, developers, property management firms, farmers - the list is practically endless. We can provide high resolution photo prints, digital photo files, or both. What can we shoot for you?

## Vertical or Oblique?

After consulting with the client, we will determine which kind of aerial photo is needed: vertical or oblique. Fortunately, we have the ability to shoot both. A vertical view is shot directly over the subject, nearly straight down from the aircraft, while an oblique view offers an angular, wider perspective (like the photo of Richmond below).

## Where do we operate?

We cover all of Virginia, the Carolinas, Maryland, Washington D.C., West Virginia and most areas within a 250 mile radius of Central Virginia. And with our affiliations, we can provide aerial images of practically any site in the United States.
